

RADOX 155 Leads

Use in Class B and F electric motors and transformers.

The application is to connect the copper winding to the terminal box of the motor or transformer.

Benefits of RADOX ^{1/2}

Features

- Round conductor diameter;
- Extruded insulation
- Compatibility to resins and varnishes

Benefits

- Allows a smaller outer diameter, saves space and weight
- Easy to strip; easy processing
- Avoids leads becoming brittle cracking

Benefits of RADOX ^{2/2}

Features

- E-Beam cross linked
- High thermal compression resistance
- Good chemical and mechanical resistance
- High dielectric resistance

Benefits

- Short circuit overload up
- No additional mechanical protection is needed
- Wide area of applications
- Allows to reduce the wall thickness
